

## Instructions for Printable Measuring Tape

1. Cut out each section of the Customized Measuring Tape (Cut as many as you require for your size).
2. Join (tape) the sections together as follows: **A** joins to **A**, **B** joins to **B**, **C** joins to **C**, and so on.

### Printing Problems?

If you're having trouble getting the tape measure to print properly:

1. Check your margins. The top, bottom, left and right margins each can be set to no more than 0.25 inches.
2. Check your printer settings:  
If you have options like "Shrink to Fit" or "Fit to Page" enabled, your inches may not be exact. Make sure all shrinkage and magnification options are turned off, and the printer prints the page as it receives it, without re-sizing.
